webiz™

Track Better . Grow Smarter .

ABOUT WEBIZ

WEBIZ is designed to **empower warehouse operations with intelligence**, visibility, and agility. It streamlines inventory, scanning, order processing, dispatch, and reporting - all in one centralized platform.

The goal: enable faster decision-making, accurate reporting, and business control that drives productivity and growth.

YOUR CHALLENGES

- Fragmented tools and manual processes

- Inefficient inventory tracking and delaye dispatch

- High probability of Error in data entry

- Lack of real-time visibility and decision-making insights

- Weak MIS, customer analysis, and productivity metrics

- Poor vehicle and manpower tracking, affecting KPIs

- Unclear operational accountability or stock accuracy

OUR SOLUTION

WEBIZ is a web-based platform that unifies the warehouse inventory and order processing operations into a, real-time system. It improves:

- Accuracy in scanning, dispatch, and inward processes
- Feature-rich solution tailored for diverse operational needs
- Decision-making through dashboards and advanced reports
- Inventory optimization for faster reordering & lean operations
- KPI tracking across manpower, stock, vehicles, and productivity
- Data integrity and security with role-based access and activity logging
- Operational efficiency from inward to dispatch
- Integrated with Barcode & RFID technologies for real-time tracking
